About Medical Sales College

History

Medical device sales is a specialized sector within both the healthcare and sales industries, focused on providing medical devices and equipment to healthcare professionals, hospitals, clinics, and other medical institutions. Professionals in this field serve as a vital link between manufacturers and healthcare providers, ensuring access to the latest tools and technologies used to diagnose, treat, and care for patients.

Medical Sales College (MSC) was established in 2010 in response to the rapidly growing demand for highly trained medical device sales professionals. As the industry expanded—driven in part by an aging population and rapid technological advancements—companies increasingly struggled to find candidates with the specialized skills, clinical understanding, and sales acumen needed to succeed in this complex field. MSC was created to bridge that gap, offering industry-focused training programs designed to prepare motivated individuals for careers in medical device sales and to support employers seeking qualified, job-ready talent.

In December 2010, MSC received Initial Provisional Approval from the Colorado Department of Higher Education and is now fully Approved and Regulated by the Colorado Department of Higher Education, Private Occupational School Board. After nine successful years of operation and placing thousands of candidates in the industry, MSC launched an ambitious expansion project to bring its programs to locations across the continental United States.

In 2020, University Ventures Fund L.P., a venture capital firm specializing in educational institutions with exceptional program outcomes, recognized the value of MSC and invested in the school, resulting in a majority ownership change. Today, our team of experienced trainers and mentors—seasoned professionals with extensive clinical and sales expertise in the orthopaedic and spine sectors—are dedicated to guiding students toward becoming top-performing medical device sales representatives.

Medical Sales College corporate office is located at: 400 North Tampa Street, 15th Floor, Tampa, FL 33602 (720) 408-5269.

The Members of Medical Sales College's Board are Aanand Radia, Ryan Craig, and Nolan Muiria. Persons with 20% or more ownership or interest in Medical Sales College are: Jim Rogers and University Ventures Fund II, LP.

Our Mission

Medical Sales College provides access to higher education opportunities that enable students to develop the knowledge and skills necessary to enter and succeed in the lucrative and promising field of medical device sales and, through this education, achieve their personal and professional goals.

Our Purpose

- To facilitate effective student learning by providing appropriate knowledge, skills, and experience and to encourage their use in the field of medical device sales.
- To help bridge the gap of experience and knowledge between new and existing sales representatives in the medical device field.
- To provide students with real world knowledge of medical device sales as it relates to the salesperson's perception, the challenges related to the surgeon client, and the difficulties encountered in selling to hospitals.
- To employ faculty members who bring our students' academic excellence and the advanced skills that come from years of practice within the medical device sales profession.
- To provide critical education and fundamental instructional services that prepare students to enter the challenging field of medical device sales and become successful.
- To use the newest teaching technology as part of our instruction so that access to these resources results in a better learning environment for all.
- To assess student learning continually and use assessment data to improve the curriculum, instruction, counseling, and services offered to students.
- To be organized as a for-profit institution, and generate the financial resources necessary to support MSC's mission and satisfy its stakeholders.
- To provide an educational experience to the student that will provide a lifetime of knowledge– more than simply a career.

Our Educational Values

Accountability

In their capacity as professional medical sales representatives, each student will be accountable to hiring managers, to the manufacturers they represent, to the patient, to the surgeon customer, and to themselves. As a result, students must practice being accountable – to all stakeholders.

Commitment

Each student must understand the importance of doing what is promised, by the time it is promised. Every company requires that employees demonstrate commitment and be actively engaged in activities that lead to success. Total effort will be expected each day.

Communication

Open and direct communication is crucial to facilitate smooth operations within an organization. Moreover, the invaluable relationships built with surgeon customers are founded upon communication. MSC expects students to demonstrate effective communication skills daily.

Customer Service

Customer service and relationship building are the cornerstones of success in any business. MSC teaches the fundamental principle that “if we do not take care of the customer, someone else will”. Surgeon customers demand and deserve exceptional service. MSC encourages students to embrace a customer-focused approach to their interactions.

Self-Direction

Successful sales reps require a great deal of internal drive and initiative. They must be self-thinkers and self-starters. MSC encourages students to be curious, to ask questions, and to exercise creative thinking. Ultimately, sales reps must be resourceful and learn how to create value.

Flexibility

Sales representatives in the medical device industry will constantly be challenged with new products, new opportunities, and new obstacles. Successful salespeople are flexible, and eagerly adapt to change. MSC promotes an environment where change and innovation are valued.

Participation

All sales reps – regardless of their level within an organization – get their “hands dirty” and “pitch in” to help. MSC encourages students to take pride in their careers, to take an active role in all activities, and to offer unique contributions to the learning environment.

Teamwork

Sales representatives collaborate with surgical teams to solve problems, make decisions, and take action that will result in the best patient outcomes. MSC emphasizes that patient outcomes reflect all contributors, and these good outcomes precede individual gain.

Licenses and Approvals and Disclosures

State Approval

Medical Sales College is licensed to operate by the Arizona State Board for Private Post-Secondary Education. The State Board address is:

1740 W. Adams Street, #3008 Phoenix, AZ 85007.

Phone: 602/542-5709 Website: http://ppse.az.gov

Accreditation and Eligibility for Federal Student Assistance

Medical Sales College is an unaccredited institution and does not participate nor is approved to participate in any state or Federal financial aid programs.

Articulation Agreements

Medical Sales College does not have any written articulation agreements for the transferability of credits with any other institutions.

Academic Delivery

This is a residential program in which students will receive a total of 225 clock hours of instruction over the course of 10 weeks on campus.

Class Hours

All students are expected to be present Tuesday, Wednesday and Thursday during the scheduled-on campus class hours: 7:00am – 4:00pm. There will be two 15-minute breaks and a one-hour lunch break. Please refer to your Enrollment Agreement for your specific class hours.

Administrative Office Hours

Office hours are 7:00 a.m. to 4:00 p.m. Monday through Friday. If you need office support, please contact our office during normal business hours.

School/Office Holidays

MSC observes the following holidays:

- New Year's Day
- Memorial Day
- Independence Day (4th of July)
- Labor Day
- Thanksgiving Day
- Friday After Thanksgiving Day
- Christmas Eve
- Christmas Day

If one of these holidays falls on a weekend, MSC may observe the holiday on the Friday preceding or the Monday following the actual holiday.

Facilities, Learning Resources and Equipment

MSC provides exceptional facilities and training tools designed to promote a comprehensive education in medical device sales. We maintain classrooms, a mock-up of an operating room, and sawbones labs.

Additional training tools that may be offered to supplement the lecture and classroom environment include:

- PowerPoint Presentations
- Internet Research Exercises
- Skeletal Models
- Surgical Instrumentation and Equipment
- Surgical Videos
- Surgical Education

Medical Sales College students have access to the LMS, which is an online database of information required to succeed as a medical sales representative. The LMS resources includes:

- Medical terminology
- Medical vocabulary
- Surgical techniques
- Product manuals
- Procedures
- Surgeon profiles

In addition to the resources that are related specifically to the programs, students may access their local libraries for general learning resources.

Medical Sales College utilizes Canvas as its learning management system (LMS). Canvas is a reliable, cloud-based system that includes the features necessary to support interactive education. The LMS accommodates many kinds of online content, such as articles, PDFs, presentations, videos, SlideShare files, images, audio files, live web content. It also facilitates communication among and between students, their peers, and instructors with email tools, discussion forums, etc. Additionally, it allows MSC staff to see the student's amount of time spent within the LMS.

Students will receive a secure log-in username and password to access the LMS.

Equipment includes:

Reamers, trials, retractors, trauma tray, screws, plates, surgical sets, large power, saw handpiece, sag blade, sawbones, video camera, projector/TV, printer, mayo stand, OR bed, back table, ring stand, knee holder, student tables & chairs. Student access to a refrigerator and microwave is also provided.

The Goal of the School

The goal of MSC is to fill a niche in a specific area of education and to prepare students for a specialized sales job in medical device sales. MSC will attempt to provide an education, an exposure, a familiarity with the nomenclature to the science of medical devices, and a realistic sales training specific to successful medical sales. MSC will determine the best candidates for admission and offer only those candidates' acceptance into MSC.

The Goal of the Student

The goal of the student is to learn how to become successful in the medical device sales field. The student will learn areas of human anatomy nomenclature specific to the industry and gain knowledge of surgical procedures and sales training aimed specifically toward medical device sales.

Admissions

Applying to Medical Sales College

MSC is committed to making educational opportunities available to all applicants wishing to enter the field of medical device sales. Admission is based on evidence of previous levels of achievement in areas such as academics, business, and competitive sports, along with the applicant's performance on their phone interviews which is designed to gauge the level of sales aptitude of the applicant during their application and screening process.

Applicants, students, and the industry benefit equally from MSC's admission policies. It is the successful graduates of MSC that perform in the field for companies and, therefore, it is the companies that continue to return to MSC for top sales performers that ensures the continued success of our graduates and MSC, alike.

There is no "formula" for gaining admission to MSC. Students with vastly different credentials come from across the country and from many different industries and backgrounds. What is common in our students is the talent they bring to MSC and the passion to explore and succeed in the medical device industry.

As a prospective student, you are encouraged to review this catalog prior to signing an Enrollment Agreement. You are also encouraged to review the addendum for your state of residency which will identify any additional disclosures and or policies not included in the catalog and are required by the state licensing authority in the state in which you reside.

Admission Requirements

Applicants must be 18 years of age and provide evidence of having earned a High School Diploma, GED or Higher. A current resume or CV must be provided, and a phone interview conducted. They must also meet MSC's English Proficiency Requirements (EPR).

What Do We Look For?

Applicants can set themselves apart from thousands of other applicants in various ways. Some show promise through previous experiences or achievements in a business endeavor. Other successful applicants have demonstrated excellence in academic or extracurricular initiatives. Still others bring perspectives formed by unusual personal circumstances or experiences.

Admission Process

The process begins with an enrollment application. After submitting an enrollment application, MSC's admission staff will contact the applicant to discuss the process, program and technology requirements and answer any questions the applicant may have. We will explore the applicant's potential fit for MSC and the industry. Applicants will be required to provide a copy of their transcripts, degree or diploma and a current resume or CV. Determination of acceptance to MSC will be granted by a licensed agent of the State, where required.

Technology Requirements

Students must have regular daily access to a laptop computer or tablet, and bring the computer to all classes, which the following minimum requirements:

- A functioning email account
- High-speed Internet access
- A supported web browser (Google Chrome - Preferred)
- Functioning audio input/output (Speakers, Microphone and Camera)
- Most up-to-date downloaded version of “Lockdown browser”

Note: Best practice is to allow application software to update as new versions are released.

Postponement of Starting Date

Postponement of the starting date, whether at the request of MSC or the student, requires a written agreement signed by the student and MSC. The agreement must set forth:

- Whether the postponement is for the convenience of MSC or student, and
- A deadline for the new start date, beyond which the start date will not be postponed

If the course is not commenced, or the student fails to attend by the new start date set forth in the agreement, the student will be entitled to a full refund of all monies paid to MSC.

Late Enrollment Policy

A late enrollment is defined as less than 30 days prior to the program's scheduled start date. A student may not enroll more than seven (7) days past the start date of the program and will have to defer enrollment to the next class start date. Permission to register late does not affect any academic policies.

Immunizations

As future medical device sales professionals, and the work you will perform in the operating room, please be aware there are a number of industry required immunizations. We encourage all students to have these completed prior to beginning their job search.

- MMR
- TB
- Hepatitis B
- Varicella or proof of chickenpox
- Current seasonal flu vaccine
- COVID-19

Certificate Programs

TotalOrtho+ Program -225 Total Clock Hours

Program Objective and Description

The objective of this program is to equip students with the training and skills needed to secure entry-level employment in medical device sales. The curriculum provides comprehensive coverage of orthopedic specialties, including Knees, Hips, Shoulders, Spine, Trauma,

Extremities, Sports Medicine, Biologics, and Regenerative Medicine. The program also emphasizes advanced sales techniques, such as evidence-based selling, problem-based selling, and territory business planning, ensuring graduates are well-prepared for the demands of the medical sales field.

This program is conducted entirely in-person, fostering an immersive and interactive learning environment. Each week begins and ends with asynchronous online homework assignments designed to reinforce key concepts and prepare students for the in-person sessions. These assignments include self-directed learning modules and assessments that complement the hands-on, instructor-led training delivered during the week.

Students will participate in dynamic classroom instruction, live discussions, and hands-on workshops, with the program culminating in a final week of saw bone instruction. This practical component ensures students can apply their knowledge and skills in realistic, real-world scenarios.

Graduates of this program will be well-prepared for employment opportunities across the United States. Upon successful completion, students will receive a Certificate of Completion in Total Ortho+, a credential that signifies their readiness to enter the workforce in orthopedic medical sales. The program also includes a year-long career placement service, offering personalized support such as resume building, interview preparation, and access to an extensive professional network. Our dedicated team is committed to helping graduates achieve their career goals in this competitive and rewarding field.

The following is an overview of content taught within this program:

- Program Orientation
- Professional Representative Certification (PRC)/Pre-Study
- Program Welcome & Foundations
- Trauma & Pathology
- Regenerative Medicine/Biologics
- Specialty Curriculum (Extremities, Knees, Hips, Shoulders, Spine)
- Advanced Sales Methodologies, Industry/Market Insights & Training
- Hospital Buying Cycles & Logistics
- Business Development & Placement Services
- SawBones Lab

The following course material will be taught over 10 weeks. Students will utilize Canvas LMS which serves as the student's portal for the entire program.

Program Orientation

The Program Orientation is designed to ensure you have all the tools and knowledge necessary to succeed in the Orthopedic Medical Sales Program. During this orientation, you'll be introduced to the Canvas Learning Management System (LMS), which will serve as your central hub for accessing course materials, submitting assignments, participating in discussions, and tracking your progress throughout the program.

You'll receive a detailed walkthrough of Canvas, learning how to navigate the system effectively and utilize all its features. This includes accessing weekly learning modules, submitting assignments, engaging in discussions with peers and instructors, and reviewing feedback to ensure you stay on track for success.

Additionally, the orientation will provide an overview of the program structure, expectations, and resources available to support your learning journey. You'll gain insights into how to prepare for the in-person training sessions and maximize the value of the asynchronous online assignments that bookend each week.

By the end of the orientation, you will be fully equipped to begin the program with confidence, ready to engage with the curriculum and build the skills necessary for a successful career in orthopedic medical sales.

Professional Representative Certification (PRC)- Recommended Pre-Study

As a requirement, all medical sales representatives must complete industry credentialing prior to entering the operating room. Knowing hospital protocol and operating room etiquette is a must. Most company sponsored training programs spend less than a day covering this subject matter. At Med Sales Institute, we offer the best-trained professional representatives for the benefit of the employer, hospital and patient safety. In addition, as a selling representative, you work with several departments at the hospital. Prior to the start of the course, our PRC segment, a student of the Med Sales Institute takes it a step further. A typical representative learns by trial and error. At Med Sales Institute we want to give you every advantage to succeed. Outside of hospital protocol and operating room etiquette, we also cover industry regulations.

- Introduction to the Operating Room
- Fire Safety; Laser; Radiation; Electrical Biomedical
- National Patient Safety Goals
- How the FDA Regulates Medical Device Manufacturers
- Regulations of Adverse Events & Complaint Handling
- HIPAA
- Blood Borne Pathogens
- Infection Control
- Aseptic Principles & Techniques
- AdvaMed
- Code of Ethics
- O.R Conduct for the Sales Rep
- SPD, Decontamination & Instrument Processing
- Compliance & the Sunshine Act
- Off Label Awareness
- General Surgical Instrumentation

TotalOrtho+ Foundations

Week 1 introduces students to the essential elements of the orthopedic medical device industry, establishing a strong foundation for success in the program. The focus is on core topics including basic human anatomy, fundamental surgical instruments, and orientation to Medical Sales College (MSC) expectations and resources. Students will gain familiarity with key terminology, concepts, and the structure of the orthopedic sales environment.

Hands-on learning is emphasized through three streamlined labs designed to reinforce anatomical knowledge and instrument handling. To support improved pacing and learning progression, the Week 1 assessment has been shifted to Tuesday of Week 2. By the end of this module, students will have a clear understanding of orthopedic fundamentals and the framework needed to build on these skills in subsequent weeks.

Sales I: Foundations of Medical Device Sales & Communication

Week 2 focuses on the essential communication and relationship-building skills required for success in medical device sales. Students will learn to establish trust and credibility with customers, apply effective verbal and non-verbal communication techniques, research and understand their sales territory, and translate these fundamentals into professional introductions and early-stage sales encounters. The goal is to position the rep as a trusted advisor through relationship-centered selling.

Sales II: Advanced Selling & Career Pathways

Week 3 transitions beyond sales fundamentals to focus on sophisticated selling techniques and professional career alignment. Students will analyze complex hospital buyer dynamics, master evidence-based, needs-based, and solution-based sales approaches, and learn advanced objection handling and negotiation frameworks. The final focus is on career mapping: students will align their personal strengths and communication styles with specific medical device specialties (Trauma, Recon, Spine, Biologics, etc.) and develop a professional brand through a focused résumé and optimized LinkedIn profile.

Trauma I (Upper Extremities)

Week 4 focuses on trauma-related conditions and procedures involving the upper extremities, providing students with a strong foundation in the anatomy, injury mechanisms, and surgical solutions specific to the shoulder, arm, elbow, and wrist. Students will explore common fractures, dislocations, and soft tissue injuries, as well as the medical devices and implants used in their treatment.

Trauma II (Lower Extremities)

Week 5 delves into trauma-related conditions and procedures affecting the lower extremities, focusing on the clinical, surgical, and product knowledge essential for managing injuries to the pelvis, hip, femur, tibia, fibula, ankle, and foot. Students will gain expertise in the anatomy, injury

mechanisms, and treatment options for common lower extremity trauma cases, along with an understanding of the medical devices and implants used in their repair.

Sports Medicine

Week 6 provides students with essential knowledge and skills to support orthopedic care for athletes and active individuals. It covers common sports-related injuries, such as ACL, MCL, and meniscal tears, shoulder injuries, and stress fractures, focusing on both surgical and non-surgical interventions. Students will explore key procedures like ACL reconstruction, arthroscopy, and the role of biologics in recovery, alongside strategies for injury prevention and rehabilitation.

With interactive lessons and case studies, this module prepares students to effectively engage with healthcare providers, athletic trainers, and surgeons, equipping them to specialize in sports medicine solutions within the medical device sales field.

Knee Curriculum

Week 7 provides students with a comprehensive understanding of knee anatomy, biomechanics, and common pathologies. Students will study degenerative conditions, sports-related injuries, and trauma, along with current surgical interventions such as arthroscopy, ligament reconstruction, and arthroplasty. The curriculum emphasizes implant technologies, radiograph interpretation, competitive product analysis, and hands-on role-play scenarios to strengthen both clinical knowledge and sales communication skills.

Hip & Shoulder Curriculum

Week 8 covers two of the most complex joints in orthopedics. Students will explore hip biomechanics, arthroplasty history, implant evolution, and surgical approaches for degenerative and traumatic conditions. In the shoulder component, students will focus on the joint's intricate anatomy and wide range of motion, examining common injuries such as rotator cuff tears and labral pathologies, as well as surgical repair techniques. Both hip and shoulder content emphasize radiographic analysis, implant technologies, competitive product evaluation, and sales-focused role-play applications.

Spine Curriculum (ACDF Focus)

Week 9 module provides focused instruction on **Anterior Cervical Discectomy and Fusion (ACDF)**. Students will study cervical spine anatomy, biomechanics, and common cervical pathologies such as degenerative disc disease and herniations. The curriculum explores ACDF surgical techniques, plating technologies, graft materials, and device design concepts. Students will also engage in competitive product analysis and role-play activities to strengthen their ability to position cervical solutions in clinical and sales settings.

Employment Readiness

Week 10, the last and final week of education is focused on business development & student placement. With the vast amount of industry connections, along with the launch of Zero Fee

recruiting, this is what makes the difference for our students. The following are the specifics of our placement activity. Our goal is for students to be interviewing the first week after graduation.

- Zero Fee Recruiting
- Networking Plan
- Hiring Manager Target Sheet
- LinkedIn InMail Campaign
- Distributor In-Person Visits
- Interview Follow-Up

Course Materials and Hours

Course Materials:

- MedTech Intel (4-month user subscription included with tuition)
- Understand.com (license included with tuition)
- RepPrep.ai
- MSC Career Placement Services & ZeroFee Recruiting (12-month post graduation user subscription)

Module # and Title	Classes	Lessons	Assignments
	Details)		

Graduation Requirements

Students must complete all course work and earn a cumulative score of 71% or higher and satisfy all financial obligations to the school.

Occupational and Instructional Program Classifications

The programs offered are designed to provide graduates entrance into the career field of:

Sales Representatives, wholesale and manufacturing, technical and scientific products, as defined by the United States Department of Labor's Standard Occupational Classification (SOC code): 41-4011 Classification of Instructional Program (CIP code) 52.1804. There is currently no industry license or certification exam required for an employment opportunity as a Medical Device Representative.

Student Services

Awards

Medical Sales College MVP (Most Valuable Player): This award is a distinguished honor bestowed upon the individual who demonstrates exceptional performance, combining both subjective assessments and objective achievements. This award is calculated through a two-part scoring system designed to offer a balanced and fair evaluation of each student's contributions and skills.

Star Ranking: The first component of the score is the Star Ranking, which is derived from the collective average of all weekly instructors' ratings for each student. Each student is rated on a scale of 1 to 5, and this average is then multiplied by 20 to convert it to a scale out of 100. The inclusion of decimal points in this calculation ensures a high degree of precision, significantly reducing the likelihood of any ties.

Technical Score Total: The second component is the Technical Score Total, which directly measures each student's technical proficiency, participation, attendance, and accomplishments on a scale up to 100. This score is intended to objectively quantify the technical contributions and expertise of the student.

To determine the overall MSC MVP score, the Star Ranking and Technical Score Total are added together and then divided by two. This calculation produces a final score out of 100 for each student. The student with the highest final score is awarded the MSC MVP, recognizing them as the top performer among their peers. This system ensures a comprehensive

assessment, valuing both the qualitative insights of instructors and the quantifiable technical achievements of the students.

Placement Services

Job placement assistance for successful graduates of Medical Sales College is provided by our Talent Acquisition Team. This team only represents MSC graduates and their mission is to support successful MSC students with initial job placement assistance into a medical sales career. They are not structured to provide ongoing recruiting services to graduates AFTER they obtain their initial job in medical sales. They are committed to working with successful graduates of Medical Sales College for 12 months following the completion of their program. Any student that does not attend the final week of their enrolled program will forgo their right to placement services. **Current law prohibits any school from guaranteeing job placement as an inducement to enroll students.**

The goal of Medical Sales College is to offer qualified professionals the opportunity to receive specialized, hands-on training related to the products, procedures, and selling skills necessary to excel in the field of medical device sales. Because graduates of MSC have prepared themselves for sales opportunities in the device industry, they are uniquely qualified to have very different conversations with hiring managers. When a graduate of MSC sits in front of a hiring manager, they are able to speak a language that resonates with the manager, they are able to demonstrate their preparation for managing a territory, and they are able to articulate a clear and defined plan for driving business immediately. These attributes are extremely valuable to hiring managers, who have a compelling need for professional representation of their products.

The resources of the Talent Acquisition Team are available to successful graduates of MSC free of any charge. Graduates are not obligated to utilize the services offered by this team.

MSC has established relationships with hiring managers in the medical device industry and maintains a database of thousands of employers. The placement process utilized by this team has assisted in the job placement of thousands of Medical Sales College graduates. This success rate is due to many factors, but one is the fact that talented sales professionals who completed MSC in past years have “paved the way” for subsequent graduates.

There is a powerful and synergistic relationship between MSC, its graduates, and the Talent Acquisition Team. Medical Sales College identifies and trains talented professionals. Our team identifies opportunities for MSC graduates and presents them for consideration. Upon hire, these professionals excel in the field. As graduates of MSC continue to excel, more and more employment opportunities are presented for future graduates. It becomes a “win-win” situation for all.

The Job Hunt Process: An MSC Graduate’s Role

Finding a job after completing MSC is a process. Both MSC graduates and the Talent AcquisitionTeam have important roles to play in this process. What cannot be overstated is how fundamentally important the graduate’s role is. As part of the training at Medical Sales College, students are provided with specific instructions and suggestions for networking to find job opportunities on their own. These strategies and concepts are discussed in depth during the program.

Philosophy

Because the Talent Acquisition Team is a component of Medical Sales College, they can provide their recruiting services at no cost to the employer. This concept was initiated in 2012 and has been marketed to potential employers as “Zero Fee Recruiting.” By participating in Zero Fee Recruiting, companies can interview and hire someone trained to do the job, someone who is prepared to succeed immediately; all at no cost to the employer.

The efforts of the Talent Acquisition Team are often directed at the corporate executives and HR recruiting staff who make national and global decisions regarding sales force composition and management. These individuals have a “big picture” view and the problems associated with hiring and retaining key sales reps resonate deeply in their daily lives.

Distributor- Hiring Manager Level

Many companies work through an independent distributor network, so that hiring decisions are made at the local level rather than the national level. Even in companies with a direct sales force, final hiring decisions are often made by local field hiring managers. It is the goal of our team to understand what the local needs are currently and perhaps more importantly, what needs are anticipated in the foreseeable future. All information is held in the strictest of business confidence.

Because of the depth of these relationships, we can monitor the progress of MSC students throughout the course of their training, and beyond, and are able to present the most appropriate candidates for interview opportunities, based on the specific needs and preferences of the hiring manager. Obviously, it is incumbent upon the student to present themselves, their skills, and their performance in a manner that leaves as good an impression as possible, as these opportunities are often highly competitive and eagerly sought after.

It is the depth of these relationships and this level of business intelligence that gives our team a competitive advantage. Because of the nature of the orthopaedic, spine and the medical sales industries, many jobs are never posted for public application. This is partially since the requirements for success are so high and hiring managers do not want to be inundated with unqualified candidates.

It is also, however, because the job search is often designed with the intention of replacing an existing, under-performing sales rep without disrupting the business they are currently servicing. This means that the search must be conducted with the utmost discretion.

The Process

In May 2016, MSC launched a free recruiting website to provide our industry partners with a simple and easy way to review potential MSC graduates. This website is www.zerofeerecruiting.com and is only available to MSC graduates. Each Medical Sales College graduate who successfully completes the program creates a personal profile on this website. Specific information is uploaded on the website by the student to create a positive impression for a potential employer. Examples of the type of information on the profile include the student’s resume, course of study, grade earned, interview questions, and awards earned. In addition, each student is given the opportunity to create a personal video as well. This video is also uploaded on the site and enables the graduate to have a virtual “face to face” interview

with a potential employer. Feedback on the free recruiting website from our employing partners has been universally positive.

In addition, the Talent Acquisition Team is often engaged in filling an open sales position for a hiring manager. The recruiting process begins by identifying available candidates for that opportunity. This determination will be based on geography, skill set, specific training fulfilled, hiring manager preferences, and a host of other issues. After the most qualified candidates have been identified, recruiters gather information (i.e. resumes, biographical information, and performance at MSC) that is forwarded to the hiring manager for their review.

While the Talent Acquisition Team attempts to manage the interview and screening process as vigorously as possible, it is, in the end, the hiring manager who makes the ultimate decision regarding any specific candidate.

The Future

MSC continues to expand its relationships both horizontally (across more companies in the industry) and vertically (deeper and deeper within the organizations). As MSC graduates outperform their peer groups, both in speed and scope of success, hiring managers and companies continue to expand the portion of their new hires that come from Medical Sales College.

While many in the medical device recruiting business have call lists and potential contact sheets that contain high level executives, The Talent Acquisition Team has hosted and continues to host senior level executives from nearly all of the major orthopaedic and spine companies, as well as an ever- expanding number of smaller, aggressive, up-and-comers. A partial list includes Stryker, DePuy Synthes, Medicrea, Zimmer Biomet, Integra, Stryker-Mako, ConMed, Wright, SpineWave, Arthrex, Smith & Nephew, Exactech, and Olympus.

MSC maintains records of the name, address, e-mail address, and telephone number of each student who is enrolled in an educational program, and for each student granted a certificate. Permanent records include all the following:

1. The certificate granted and the date on which the certificate was granted.
2. The program and hours for which the certificate was based.
3. The grades earned by the student.
4. The student’s ledger

A Certificate is issued to the student upon graduation. Additional Certificates or transcripts may be requested from the office and will be provided electronically.

Tutoring and Technical Support

Students who need additional assistance are encouraged to contact their instructor for tutoring during their office hours provided in the Syllabus on Mondays and Fridays.

Online technical support is provided during office hours via the Canvas Help Ticket Desk. Support services are exclusively for issues pertaining to access to our online platform.

Policies and Procedures

Academic Calendar

The academic schedule of program start dates is subject to change due to corporate and market demands. Please visit our website at www.medicalsalescollege.com for the most current upcoming class dates.

Start Date	Program
1/06/2026	TotalOrtho+
5/19/2026	TotalOrtho+
9/29/2026	TotalOrtho+

Academic Standing/Satisfactory Academic Progress

Advanced Standing

Students with a cumulative score of 90% or higher on evaluations will be considered to have an advanced standing with MSI.

Satisfactory Academic Progress

Students with a cumulative score of 71% or above at the end of each week will be in satisfactory standing with MSI.

Academic Probation

Students will be placed on academic probation if their grade falls below 71% over a two-week period. To remain enrolled, the student must show sufficient academic improvement within the following two weeks.

If the school determines that the student has made progress, but is still below the 71% threshold, the probationary period may be extended. Factors considered in allowing a probation extension include but are not limited to the time remaining in the program, the student's cumulative grade relative to the 71% threshold, and the student's attendance/ participation efforts during the probationary period.

Dismissal

Students placed on academic probation that fail to demonstrate sufficient academic improvement during the probationary period will be dismissed from the program.

Academic Integrity Policy

MSC is committed to maintaining a strict academic integrity policy to uphold honesty and ethical conduct among all students. It is expected that students submit work that is entirely their own and provide proper credit for any sources used in assignments. Acts of plagiarism, cheating, or any other forms of academic dishonesty are strictly prohibited and will not be

tolerated. Violations of this policy may result in disciplinary action, ensuring a fair and equitable learning environment for everyone.

We understand that AI tools are part of today's learning environment, and you may use them in some parts of our curriculum. However, AI should be used as a guide to help you learn and generate ideas, not as a shortcut. Copying and pasting AI-generated text and turning it in as your own is considered academic dishonesty.

Examples of **acceptable AI use**:

- Using AI to explain a concept in simpler terms.
- Checking your grammar or clarity.
- Brainstorming ideas or outlines for an assignment.

Examples of **unacceptable AI use**:

- Submitting AI-written answers or essays as your own.
- Using AI to complete quizzes, exams, or graded work.
- Relying on AI without showing your own understanding.

Assumption Of Risk By The Student

During the program and as part of the educational process, students may be using power tools (i.e. surgical drills and saws) to obtain a familiarity with the subject matter. The student agrees to assume the risk of using these power tools and hereby releases MSC and its instructors, employees, and staff from any liability or injury that may arise from usage of these tools in the program. Additionally, MSC has no liability for any actions or occurrences that may occur outside of MSC's physical location while the student is attending the program. The conduct, activities, and participation by the student in any sporting event, function, or activity outside of MSC, regardless of the level of participation by School associates, is entirely at the student's own risk and the student agrees to assume all risks in any activity, physical or social in nature.

Attendance Policy

Regular, on-time attendance is essential to the student's learning process. When students are absent, tardy, or leave early, they must communicate this to their instructor and make an effort to stay current on all class work during their absence. Excessive failure to report to class in a timely manner, reporting unprepared for the day's lessons, or departing early without approval is grounds for corrective action up to and including removal from the class. Refer to the Termination Policy for more information.

Instructors will maintain a record of attendance for all class sessions (absences and tardies) within Canvas. The last date of attendance for refund purposes is the last day a student is marked present in class. If absent for a short duration (due to sickness or for other personal reasons) assignments may be "made up" by contacting their instructor; See the Missed Work Policy for more information. If for reasons beyond the control of the student or MSC, a student misses a substantial part of their program, then MSC may accept a Leave of Absence request for the student to complete the program in a subsequent class. Refer to the Leave of Absence policy for more information.

Students attending online are expected to attend with computer screens turned on as well as participate weekly and complete and submit all assignments on time.

Computer and Telephone Use Policy

Students are required to use their own personal laptop computers while on campus. During class hours, each student will be provided access to the secure student network. Students must always refrain from using staff computers. Cellular telephone use is not allowed within the classroom. Cellular telephone calls should be made during breaks and on the lunch hour. We strictly prohibit copyright infringement, visiting illegal websites and torrenting which may lead to disciplinary action, up to and including expulsion from MSC.

Student Conduct Policy

To ensure an optimal learning environment and maintain the integrity of its educational programs, Medical Sales College (MSC) expects all students to uphold high standards of professional conduct. Students are required to behave in a manner that reflects respect for the institution, its faculty, staff, and fellow students. While it is not possible to enumerate every form of unacceptable behavior, MSC considers any conduct that is disruptive, offensive, disrespectful, or detrimental to the campus environment to be grounds for disciplinary action, up to and including dismissal from the program. Students dismissed for behavioral violations will not be eligible for reinstatement.

The following principles outline MSC's expectations for student conduct:

Professional Integrity
Students are expected to demonstrate honesty and ethical behavior in all academic and professional activities. Cheating, plagiarism, falsification of documents or records, and other forms of academic dishonesty are strictly prohibited.

Respectful Conduct
All members of the MSC community must be treated with courtesy and respect. Inappropriate language, discriminatory remarks, harassment, or any form of hostile behavior will not be tolerated.

Classroom Engagement & Participation
Students are expected to arrive on time, remain attentive, and participate actively during instruction. Sleeping or appearing disengaged is unacceptable.

Appropriate Communication
Professionalism must be maintained in all verbal and written communications. Language that is offensive, threatening, or inappropriate is not permitted.

Academic Accountability
Students are responsible for completing assignments on time, preparing for assessments, and seeking academic support when needed.

Prohibited Disruptive Behavior
Behavior that interferes with instruction or disrupts the learning environment—including excessive talking, insubordination, or combative behavior—will result in disciplinary action.

Integrity in Representation
Students must accurately represent their qualifications, experiences, and performance in all academic and professional contexts.

Ethical Conduct in Professional Settings
Professionalism must be upheld during all externships, industry events, and interactions with representatives of the medical sales profession.

Confidentiality Agreement

The student acknowledges MSC has spent considerable funds to develop the curriculum and teaching tools used during education. These products and publications by MSC are protected, proprietary in nature, and confidentially made available only to the student. The student agrees that the material, handouts, curriculum, and other teaching tools are protected, highly confidential products of MSC. Students will not copy, redistribute, audio record, rebroadcast, or otherwise reproduce or share any of MSC's training material while in the program, and will not provide or share any materials to anyone who has not completed a program. The audio recording, redistribution, rebroadcasting, or pirating of this protected information to any non-student is actionable by MSC and subject to injunctive relief in favor of MSC. It is agreed that in any legal action arising out of this Agreement, the prevailing party shall be entitled to the recovery of reasonable attorney fees.

Disability Policy

Commitment to Accessibility and Inclusion
Medical Sales College (MSC) is committed to providing an inclusive and accessible learning environment for all students, in accordance with the Americans with Disabilities Act (ADA) and Section 504 of the Rehabilitation Act. We strive to ensure that students with disabilities receive reasonable accommodations to support their educational success while maintaining the essential requirements of our programs.

Requesting Accommodations
Students with disabilities who require accommodations are encouraged to disclose their needs as early as possible. To facilitate this process, students should submit a written request along with appropriate documentation from a qualified healthcare provider to oas@medsalescollege.com and will need to sign and complete a Student Accommodation Request Form. Accommodations are determined on an individual basis through an interactive process that considers the student's needs and the essential functions of the program.

Essential Role Requirements for Surgical Sales Representatives
The Medical Sales College curriculum is designed to prepare students for careers in medical device and surgical sales. These roles require specific physical, cognitive, and communicative abilities, including but not limited to:

- The ability to stand for extended periods in operating rooms.
- Lifting and transporting medical equipment and product samples.
- Effective verbal and written communication with healthcare professionals.
- Comprehending and demonstrating technical medical knowledge.
- Adhering to strict operating room protocols and sterile field requirements.

Students with disabilities should discuss any potential limitations with MSC before or during the admission process to ensure they can meet these role requirements with or without reasonable accommodations. While we will make every effort to provide accommodations, adjustments that fundamentally alter the nature of the program or the essential job functions of a surgical sales representative may not be possible.

Confidentiality and Non-Discrimination
All disability-related inquiries and accommodation requests will be handled with strict confidentiality. MSC does not discriminate against individuals based on disability and is dedicated to fostering an environment of equal opportunity and respect.

For more information or to request accommodations, please contact Alicia Larson, alarson@medsalecollege.com

Dress Code Policy

Students wear light blue scrubs each day, except for graduation week where students will wear a suit appropriate for an interview on the day they film their placement video.

Drug and Alcohol Policy

MSC realizes that the misuse of drugs and alcohol impairs students' health and productivity. Drug and alcohol problems result in unsafe working conditions for all students and staff. MSC is committed to maintaining a productive, safe, and healthy environment, free of unauthorized drug and alcohol use. Any student involved in the unlawful use, sale, manufacturing, dispensing, or possession of controlled substances, illicit drugs, or alcohol on MSC premises will be subject to disciplinary action up to and including dismissal from class and referral for prosecution.

There will be no alcohol stored or consumed on site at any MSC facility.

English Proficiency Requirement

The English Proficiency Requirement (EPR) is to evaluate the English language proficiency of students whose native language is not English and want to enroll in MSC. Due to the highly sensitive role and responsibilities of a medical device representative, clear and concise communication is required between the representative and the operating team to ensure patient safety. Therefore, if a language barrier is identified during the evaluation and application process, candidates may be required to submit official evidence of English language proficiency. Instruction is given in English and is not offered in any other language at this time. English Language Services are not provided by MSC.

Applicants may demonstrate competency from one of the following tests:

- **IELTS (International English Language Testing System)**: Overall band score of 6.5 or higher*

- **TOEFL (Test of English as a Foreign Language)**: Minimum score of 550 on the paper-based test or 80 on the Internet-based test

- **SAT (March 2016 or later) Writing & Language Test**: 31 or higher

- **ACT combined English-Writing or English Language Arts portion**: 24 or higher

Grades

Grading is designed to be fair and transparent, ensuring each student's performance is evaluated objectively. Faculty members assess assignments, exams, and other coursework using established criteria to maintain consistency and reliability in evaluations. Grading rubrics may be provided to help students understand expectations and how their work will be assessed. Additionally, students have the right to request feedback on their graded assignments and discuss any concerns with their instructors, fostering open communication and support for academic success.

Course status codes of “I” and “W” are defined as follows:

“I” for incomplete is assigned when a student is on an approved leave of absence and is scheduled to return to complete the program. When the student returns and completes all segments, the “I” is replaced with the grade earned. In the event the student does not return as scheduled, the student is withdrawn, and “I” is replaced with a “W”.

“W” for withdrawn is assigned as the final grade in the event a student withdraws or is withdrawn from the program.

Final course grades will be published on the ZeroFee website.

Grade Appeals

Students may contest grades during Weeks 1–9 of the program. A student has one week after the posting of the prior week’s grades to submit a grade appeal for that specific week. The process is as follows:

1. The student should first contact the instructor in writing to seek clarification or resolution.
2. If a satisfactory resolution is not reached with the instructor, the student may submit a formal grade appeal to **appeals@medicalsalescollege.com**
3. No grade appeals will be accepted in Week 10 or after graduation. Once transcript grades are posted, they are considered final and binding.

Your final grade for the program will represent a combination of your scores on all the following:

Course Grading System

Weekly Exams (50pts x 9)	**450 pts**
Weekly Sales Roleplay Assignments (10pts x 8)	**80 pts**
Weekly Territory Business Plan Assignments (20 pts x 9)	**180 pts**
Weekly Class Attendance (10pts x 10)	**100 pts**

Weekly Labs (10pts x 9)	**90 pts**
Weekly Pre-Class Homework Quizzes (10pts x 10)	**100pts**
Final Territory Business Plan Presentation (100pts x 1)	**100 pts**
Total	**1100 pts**

Grade	Percentage Range
A+	100-97
A	96.99-93
A-	92.99-90.00
B+	89.99-87.00
B	86.99-84.00
B-	83.99-80.00
C+	79.99-77.00
C	76.99-74.00
C-	73.99-71.00
F	< 71.00

Leave of Absences/ Re-enrollment

The School recognizes the need to offer students the ability to request a leave of absence (LOA). Requests must be made via email to **admin@medsalescollege.com**, including the reason for the leave of absence and the student's expected return date. A leave of absence may be granted for reasons such as illness, care of a family member, or other personal matters. The student must be in satisfactory Academic Standing to be granted a leave of absence.

If the leave request is approved, the student will be allowed to enroll in a future program at the point in the program in which their leave of absence in the initial class began. Students must attend the campus location of original enrollment. Attendance and grades from the original enrollment will be transferred to the new program of enrollment. Students may not retake any portion of the program previously completed. Enrollment in the next program start date is dependent on available space in the class and cannot be guaranteed.

Students who are granted a leave of absence will have up to **eight months** from their last date of attendance to return to complete their program. **If a second leave of absence is requested, the student must provide sufficient documentation justifying the need for an additional leave. The threshold for approving a second LOA will be higher to ensure the policy is not being misused. The decision to grant a second LOA will be at the discretion of the school, based on the documentation provided.**

If a student fails to return from an approved and scheduled leave of absence, Medical Sales College will exercise the right to withdraw the student from the school.

Missed Work Policy

All coursework — including tests, presentations, labs, and roleplays — is due on the assigned due dates. Failure to submit or complete work by the deadline will result in a zero.

It is the student's responsibility to notify their instructor in advance if an absence will prevent them from meeting a deadline and to make alternative arrangements. The instructor is under no obligation to allow make-up work if communication does not occur prior to the absence.

If an instructor approves alternative arrangements, the student must complete the work within 72 calendar hours of the original due date (including weekends and holidays). Missed work not completed within this timeframe will result in a zero.

Tests, presentations, labs, and roleplays may not be retaken or redone to improve a grade. Missed presentations and roleplays must be made up live with the instructor; recorded submissions will not be accepted or graded.

Pre-Scheduled Absence Policy

If a student should have a pre scheduled absence, the student must inform their instructor to discuss specific curriculum, assignment and tests that may be missed during their absence. Missed work due to a pre-scheduled absence is to be completed in accordance with the above Missed Work Policy.

Release of Information

The student agrees to allow the use of their images, videos, name, history and, hopefully, their ultimate success story, in any sales or marketing materials and without compensation. Each student will be invited to evaluate the training they receive at the School and to offer any personal insights or experiences that may be valuable to future students and which may assist the School in furthering its goals. The student also agrees that the School may provide their contact information to prospective students who have requested additional information about the School and the experiences of former graduates.

Safety and Security Policy

MSC is committed to maintaining a safe and secure environment. In order to maintain a secure environment, MSC strictly prohibits students and visitors from bringing any firearm onto school property. MSC reserves the right to monitor and record its classrooms and labs, for the safety and security of our students, staff, and property. In addition, video will be used for training purposes. Failure to comply with this policy will result in disciplinary action up to and including removal from class and any applicable charges being filed against the student/visitor for such a violation.

Sexual Harassment Policy

MSC seeks to provide an environment free from sexual harassment and sexual assault. MSC has a zero-tolerance policy for acts consisting of harassment or assault. Sexual harassment is

discriminatory, unlawful, and may involve the behaviors of a person of either sex against a person of the opposite or same sex. It occurs when behavior constitutes unwelcome sexual advances, request for sexual favors, and other unwelcome verbal or physical behavior of a sexual nature where such conduct is made either explicitly or implicitly as condition of employment or education, where submission or rejection is used as the basis for employment or educational decisions, or where such actions are intimidating, hostile, or offensive. MSC understands that sexual harassment may not be intentional. Any person who feels that he or she is being sexually harassed must immediately inform the President, who will initiate an investigation into the allegations and advise the School's legal counsel.

Student Complaint/Grievance Procedure

The School will work with each student to resolve any issues. Every student is encouraged to discuss their concerns or complaints with faculty or staff most able to assist the student in resolving the matter. If, however, the student is not satisfied with these efforts, then the student may pursue a formal grievance by following the procedure below:

1. Email a written complaint to appeals@medsalescollege.com, describing the basis of the complaint in enough detail to allow an investigation.

2. The Appeals Committee will review the complaint and contact the student within three working days to discuss the complaint.

3. The Appeals Committee will confirm the completion of the investigation with a written summary of the disposition of the complaint emailed to the student within five working days.

If the complaint cannot be resolved after exhausting the institution’s grievance procedure, the student may file a complaint with the Arizona State Board for Private Postsecondary Education. The student must contact the State Board for further details.

The State Board address is:

1740 W. Adams Street, #3008 Phoenix, AZ 85007

Phone: 602/542-5709

Website: http://ppse.az.gov

The above process does not limit or prohibit a student from enforcing any contractual legal rights or remedies.

Complaint Hotline

We, at Medical Sales College understand the importance of providing a safe and ethical classroom for our students. In an effort to assist with this standard we have partnered with Ethico Compliance who will provide our students with an anonymous avenue to report classroom or campus issues and concerns. This hotline is available twenty-four (24) hours a day, seven days a week and there will always be someone available to speak with our students. The line is staffed by a third-party organization that will document their concern and send the

report to someone in the Medical Sales College corporate office. The student may remain anonymous or they may choose to identify themself. Regardless of their decision, their information will be documented and investigated. The toll-free number that they can call is 888-845-0828. There is also the option to report concerns online by visiting MyComplianceReport.com. Once the student has entered the site they will click on "Begin new report" (bottom left of page). At that point they will be asked to provide an access ID which is 'MEDSC'.

Termination/Dismissal Action

The School reserves the right to terminate the enrollment of any student not limited to but including the following reasons:

1. **Termination for Consecutive Absences**
   A student's enrollment will be subject to termination if the student:
   - Misses six (6) consecutive school days
2. **Termination for Excessive Clock Hour Absences**
   A student's enrollment will also be subject to termination if the student:
   - Accumulates forty five (45) clock hours of missed instructional time and is in violation of the schools academic standing policy

3. Lack of participation, tardiness, and failure to complete essential assignments.

4. Failure to grasp and master the subject matter (See the Academic Standing Policy)

5. Violation of the student code of conduct.

6. Disruptive classroom conduct inconsistent with the goal and decorum of learning.

**Students terminated from their program are not eligible for reinstatement.*

Tobacco Policy

MSC maintains a non-tobacco and non-smoking policy within the interior of the office and office building. The use of cigarettes and/or smokeless tobacco is allowed on the exterior of the building within the designated areas only.

Transferability of Credits

The transferability of credits you earn at Medical Sales College is at the complete discretion of an institution to which you may seek to transfer. Acceptance of the certificate you earn in the educational program is also at the complete discretion of the institution to which you may seek to transfer. If the certificate that you earn at Medical Sales College is not accepted at the institution to which you seek to transfer, you may be required to repeat some or all your coursework at that institution. For this reason you should make certain that your attendance at this institution will meet your educational goals. This may include contacting an institution to which you may seek to transfer after attending Medical Sales College to determine if your certificate will transfer.

Credit for Previous Training

Due to the unique nature of the program offered, MSC does not accept transfer credit previously earned from other institutions nor is credit for experiential learning accepted. All program hours are required to be completed at the college in order for a student to be issued a certificate.

Financial Information

Tuition & Fees

Following are the costs to complete the program:

Tuition	$19,345.00
Registration Fee	$150.00
Tuition and Fee paid to MSC directly	**$19,495.00**
Additional Fees - Not paid to MSC	
Estimated costs for scrubs (3 pair @ $20/pair - Required)	$60.00
Laptop computer - refer to laptop specifications listed in this catalog (Required)	

*Program tuition does not include transportation, lodging or meals.

In addition to the scrubs required to be worn during residential training, students are required to have a business suit/outfit (appropriate for interviews) during their residential training. There are no additional costs/fees for tutoring.

Payment and Method of Payment

The student may make tuition payment(s) to the School with any major credit/debit card (Visa, MasterCard, American Express or Discover), or by check made payable to: Medical Sales College and remitted to our corporate location in Tampa, FL - 400 North Tampa Street, 15th Floor, Tampa, FL 33602. A $500.00 deposit, which includes the $150 Registration Fee, is due upon enrollment to hold the seat in the program. The remaining tuition is due 30 days prior to the start of class. Students who have not paid tuition will not be allowed to attend class.

Financing Options

Although Medical Sales College does not offer financing to students, we are pleased to have

partnered with Climb Credit and Ascent to offer financing opportunities for those who qualify. For more information please visit www.climbcredit.com and www.ascentfunding.com

*Some restrictions may apply. More information can be found on our website at www.MedicalSalesCollege.com on the Tuition & Financing page located under the Admissions tab.

Financial Aid

Medical Sales College is not approved for participation in any state or federal financial aid grant or loan programs.

Loan Disclosure

Students who require a loan to meet their tuition obligation are responsible for securing the loan and repaying their loan with interest in accordance with terms of the loan secured.

Residential Housing

MSC does not have dormitory facilities. Students who will need lodging to attend the residential portion of the program are responsible for their own arrangements. Keep in mind distance/traffic while deciding on housing. The availability of housing located reasonably near the institution's facilities and an estimation of the approximate cost or range of cost of the housing are available on our website. MSC may be able to provide housing suggestions.

Refund and Cancellation Policies and Procedures

Tuition Refund Policy

For the purpose of determining a refund under this section, a student shall be deemed to have withdrawn from a program of instruction when any of the following occurs:

- The student submits an official request to withdraw (see procedure for withdrawal below)
- The College terminates the student's enrollment for failure to maintain academic progress; failure to abide by the rules and policies stated in the catalog; absences in excess of maximum set forth by the College; and/or failure to meet financial obligations to the College.
- The student fails to return as scheduled from an approved leave of absence.

The College will complete and document the refund calculations for each student who cancels, withdraws, or is withdrawn from the program, and will provide a copy of the refund calculation to the student.

Cancellation of Enrollment

Withdrawal Policy:

In the event the student decides not to participate in the enrolled program, a request for cancellation must be submitted to the School and emailed to withdrawal@medsalescollege.com or mailed directly to: 400 North Tampa Street, 15th Floor, Tampa, FL 33602. A student's date of

withdrawal is the date the official request to withdraw is received or the last day of attendance if being withdrawn by the school.

Three-Day Cancellation:

An applicant who provides written notice of cancellation within three days (excluding Saturday, Sunday and federal and state holidays) of signing an enrollment agreement is entitled to a refund of all monies paid.

Other Cancellations:

A student who withdraws prior to the start of a program but after the three-day cancellation period expires is entitled to a refund of all monies paid to MSC less the $150 registration fee.

Refund After the Commencement of Class

Refund Table

% of the clock hours attempted:	Tuition refund amount:
10% or less	90% less Registration Fee
More than 10% and less than or equal to 20%	80% less Registration Fee
More than 20% and less than or equal to 30%	70% less Registration Fee
More than 30% and less than or equal to 40%	60% less Registration Fee
More than 40% and less than or equal to 50%	50% less Registration Fee
More than 50%	**NO REFUND**

The percentage of the clock hours attempted is determined by dividing the total number of clock hours elapsed from the student's start date to the student's date of withdrawal, by the total number of clock hours in the program. After the completion of the refund calculation, the school will deduct the $150.00 Registration Fee from the amount to be refunded.

Payment of Refunds

Refunds will be issued within 30 days of the date of student notification, or date of school determination (withdrawn due to absences or other criteria as specified in the school catalog), or in the case of a student not returning from an authorized Leave of Absence (LOA). Refunds are issued back to the source (person/organization) from whom payment was received.

It is essential for all MSC students to familiarize themselves with these policies and adhere to them throughout their academic journey. The goal of these policies is to create a supportive and rigorous learning environment that prepares students for success in the medical sales industry.
